

M-SW680 6X8" QUAD-COIL POWERED SUBWOOFER

120W powered subwoofer in a sealed enclosure

When mounting space is critical, the solution is the ultra-compact M-SW680 powered subwoofer. It adds deep, controlled bass to any audio system while taking up as little space as possible in the vehicle. Its footprint of just 280mm by 195mm allows it to be placed in very small compartments where other products would be impossible to install. The side panel provides easy access to the high-level or line-level inputs with auto-sensing function and controls for sound optimisation.

Remote level control
