

URI-RES

Interface for the recovery of steering wheel commands dedicated to vehicles with Resistive protocol

The Macrom URI-RES interface is a device for the acquisition of steering wheel commands with analogue protocol (RESISTIVE) compatible with all Macrom models.

In addition to the steering wheel controls relating to the radio unit, the interface also provides, where required, the functions relating to the telephone, call reception and closing button.

The main feature is the compatibility that extends to a large number of cars:

Alfa Romeo - Chevrolet - Chrysler - Citroen - Daihatsu - Dr – Fiat Ford - Honda - Hyundai - Isuzu - Jaguar - Kia - Land Rover Mazda Mitsubishi - Nissan - Scania - SsangYong - Subaru Suzuki - Toyota

For more information see attached table
