

URI-CAN

Interface for the recovery of steering wheel commands dedicated to vehicles with Can-Bus protocol

The Macrom URI-CAN interface is a device for the acquisition of steering wheel commands with digital protocol (CANBUS) compatible with all Macrom models.

In addition to the steering wheel controls, the interface also provides services such as key switch, lights, reverse gear and parking brake where provided on the CANBUS.

The main feature is the compatibility that extends to a large number of cars:

Alfa Romeo - Audi - BMW - Chrysler - Citroen - Dodge - Ferrari Fiat - Iveco - Jaguar - Jeep - Lancia - Mercedes - Mini - Nissan Opel - Peugeot - Renault - Seat - Skoda - Volkswagen – Volvo
